PROFILE

Analytical and detail-oriented ICT Application Development student with strong foundations in software development, web technologies, and database integration. Experienced in collaborative academic projects, quality assurance, and team leadership. I am passionate about building user-focused systems and continuously learning new technologies.

PROJECTS

Youth for a Change – NGO Website

Duration: 2024 (First Year)

Technologies: HTML, CSS, JavaScript

Role: Quality Assurance Specialist

Description:

Developed an interactive website for a non-profit organization supporting underprivileged children through educational and community initiatives.

Responsibilities:

- Tested website functionality and usability.
- Ensured consistent design and performance standards.
- Collaborated with developers to improve content and features.

CareLink – Virtual Counselling System

Duration: 2025 (Second Year)

Technologies: Java, JDBC (Java Database Connectivity)

Role: Front-End Developer | Team Leader

Description:

Built a virtual counselling web portal for CPUT students and staff, enabling secure access to mental health support services.

Responsibilities:

- Developed login, registration, and booking interfaces.
- Assisted in system design and feature implementation.
- Promoted user privacy and system security.

Additional Academic Projects

- Contributed to multiple group software projects.
- Led teams in planning, task delegation, and submissions.
- Produced technical documentation and presentations.
- Mentored peers and encouraged collaborative problem-solving.
